### Explanation of Map Unit (MU) Symbols

MU Polygons shown on this map are from Current SSURGO data. The numeric abbreviations used are the current SSURGO symbols. The older alphabetic symbols used have been researched and taken from old papers, manuals, etc. Since these older symbols are not standardized and vary from area to area, they may not correspond exactly with new MU descriptions.

This map is for planning purposes only and is not to be used as a replacement for proper soil survey practices.

Where no alphabetic MU symbol could be found, only the current numeric SSURGO abbreviation has been used
